#### **DETAILED ACTION**

# Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
   The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are replete with indefiniteness and antecedent basis errors that are too numerous to mention each one specifically. Applicant should carefully review **all** claims and correct all indefiniteness and antecedent basis problems. Some examples are noted.

Claim 1 is confusing because it is not clear if applicant is claiming the combination of the device and a post, pier etc. or the subcombination to the device only.

Claim 9 and some of the dependent claims call for "the drive axle" however; they lack antecedent basis.

Claim 9 and some other claims state that the drive axle "may be" attached. It should be noted that "may be" is not positively reciting structure; therefore such structure is not required to meet the claim limitations.

Claims14 and 20 have a similar problem as stated above with respect to claim 9.

## **Drawings**

3. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing

Application/Control Number: 10/656,017 Page 3

Art Unit: 3673

correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "22" has been used to designate both top and uneven upper edge. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

## Specification

5. The disclosure is objected to because of the following informalities: at page 4, the description of the **tubing** upper edge "20" and top "22" do not correspond to the drawings. Appropriate correction is required.

## Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Application/Control Number: 10/656,017

Art Unit: 3673

7. Claims 1-6 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Sondrup (US 6457901).

Sondrup discloses a device comprising a first element (30) having a concave transitional surface (42,44), a depending member (40), and outwardly extending flange (38).

8. Claims 1-7, 12-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Hild (US 4197031).

Hild discloses a device having a first element (31) having a concave transitional surface, a depending member, and outwardly extending flange (see Fig. 1). A second element (32).

## Claim Rejections - 35 USC § 103

- 9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 10. Claims 8-11, 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hild in view of Binns or Reinert, Sr. (US 1869880, 5431510).

Hild discloses the invention substantially as claimed. However, Hild is silent about including a drive axle/anchor bolt. Binns and Reinert, Sr. both teach a drive axle/anchor bolt (8 and see Figures). It would have been considered obvious to one of ordinary skill in the art to modify Hild to include the drive axle/anchor bolt as taught by either Binns or

Page 5

Reinert, Sr. since such a modification would allow for the removal of the second element of Hild.

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sunil Singh whose telephone number is (703) 308-4024. The examiner can normally be reached on Monday through Friday 8:30 AM-5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather Shackelford can be reached on (703) 308-2978. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
